

Otterhead Forest School Garden Scavenge Hunt

- A Dandelion
- A woodlouse
- A feather
- A wriggly worm
- A stick longer than your thumb but shorter than your arm
- The biggest leaf you can find
- A fresh spring shoot (New leaf growth)
- A stone bigger than a tic-tac but smaller than a marble
- A leaf a cheeky insect has nibbled
- Some litter, pick it up!
- A plant with a painful defence, don't touch!

Woodlice are crustaceans and closely related to Lobsters that live on the sea floor.

Dandelions close their petals at night and open the flower up again in the morning.

Buds on trees and plants turn into new growth, flowers and leaves.

The skeleton of a pigeon weighs less than its feathers.
